Good Pickin's in Arkansas

ARMED with pick, helmet and lamp, A miners throughout the state of Arkansas are extracting a great wealth of minerals—valued in 1942 at \$55,472,084 ...a gain of more than \$8,000,000 over the preceding year. Arkansas produces 35 important minerals—including zinc, lead, quartz, silver, magnesium, coal—as well as precious bauxite from which aluminum is made. 95% of all domestic bauxite is produced in Arkansas, and the state's two big aluminum plants—recently built—represent an investment of \$70,000,000.

The dawn of peace will reveal a large part of the world waiting to be rebuilt. This tremendous job will require light, strong metals and minerals in vast quantities, In supplying these materials, Arkansas—and the rest of the South—will perform a real service to humanity . . . at the same time

establishing a new, far-reaching prosperity for her own people.
